

4 Courses

Fundamentals of Network  
Communication

Peer-to-Peer Protocols and  
Local Area Networks

Packet Switching Networks and  
Algorithms

TCP/IP and Advanced Topics

03/28/2020

**Adithya Bhaskar**

has successfully completed the online, non-credit Specialization

## Computer Communications

In this Specialization, learners developed and honed essential skills in fundamental computer networking concepts and principles, apply the networking theory and design principles, verify their understandings, and build a solid foundation for creating innovations in today's Internet. It lays foundations of network architectures, protocol design principles, and TCP/IP programming skills, which are necessary to take more advanced courses in graduate study and/or technical training in the industry. The Specialization also covered basic networking knowledge and in-depth understanding of the inner-workings of computer networks and their evolution. Learners completed all the required assessments to apply their new knowledge and skills
